

“DIGI PRODUCT QUOTES”

Accessing the FREE Editor

1. To access the FREE editor for editing the PSD files, simply go to <http://PhotoPea.com>
2. When you open the site, there will be a large box in the middle of the screen as shown below in Image1. Click “Open From Computer”
3. Select the PSD that you wish to use from your computer and it will be uploaded automatically.
4. Once uploaded, you will see the image in the centre of the screen as shown below in Image2.
5. To edit the text, click on the LAYER at the right hand side (#1), then click the T on the left side (#2), and then click the actual text and begin editing.
6. To save your completed work, click File in the top menu as shown in image 3, and then select “Export As”, and then select either PNG or JPG.

It’s a very simple editor to use. I hope you enjoy using it.
